B.A. III SOCIOLOGY.**Paper I – Foundations of Sociological Thought****Objectives:**

Sociology originated as an intellectual response to the crisis facing the mid nineteenth century European society. Its development over two century since then has been influenced by a variety of socio-economic and political conditions where it has been taught and practiced. It has been established as a multi-paradigmatic academic discipline, with its body of enriched theoretical knowledge and its methodological techniques and procedures systemized. Nevertheless, some of its original concerns have persisted and some of its classical theoretical and methodological landmarks are relevant even now.

This paper is intended to familiarize the students with the social, political, economic and intellectual contexts in which sociology emerged as a distinctive discipline. Its objective is to help students gain an understanding of some of the classical contributions in sociology, and their continuing relevance to its contemporary concerns.
